

# DEFEAT DEBRIS.

## TracVac™

Suction Cleaner

Unstoppable coverage from floor to wall.

 **HAYWARD**<sup>®</sup>  
We Build Better.™

# TracVac™

## Suction Cleaner

## ENDLESS TRACTION FOR A THOROUGH CLEAN

The **Hayward TracVac™** is an in-ground, suction cleaner designed for maximum clean with minimal effort. Patented adjustable skirts on the cleaner enable the machine to retain optimal suction and overcome obstacles more effectively than conventional cleaners. This cleaner is small but mighty. Its modest size allows the TracVac to navigate any pool surface with speed and agility and lightweight construction makes it easy to handle.

- **Rugged Tracks** – Patented track system and unique underbody ensures cleaning on all pool surfaces and shapes.
- **Superior Mobility** - Maneuvers over drains and attacks hard to reach spaces.
- **Powerful Performance** - Eliminates debris and fine particles in less time.
- **Light, Yet Reliable** - Long lasting drive train and hollow turbine which allows for limitless service.
